Assembly

HB Series Clute-pattern Leatherface Glove

The select shoulder-split leather used in our Leatherface gloves provides the best protection against abrasion. We've also used heavier 9 oz. cotton at the back for better seam strength, making our HB series an excellent value in leather-palm gloves. This glove has a fuller, more generous hand size than our economy version. Knit-wrist cuff prevents debris from falling into glove.

650HB Clute cut, select shoulder split, 9 oz. cotton back, knit wrist

Engineered hand protection for every industry™
