

Item No.
NE3030

Chemstop™ **UNSUPPORTED NEOPRENE** Gloves

FUNCTIONAL BENEFITS:

Resists a wide range of chemicals, and aging/breakdown

Good cut, puncture and abrasion resistance

Withstands temperatures up to 200°F, (93°C) flame-resistant.

Flocked cotton lining to absorb perspiration

APPLICATIONS:

Commercial Fishing

Food handling

Automotive

Oil Refineries

Petrochemical

Degreasing

Refining

Plating

Galvanizing

NE3030

Chemstop™ Unsupported Neoprene Gloves

Neoprene is the DuPont trade name for chloroprene, the first commercial synthetic rubber created. Neoprene has good abrasion and cut resistance, while resisting the effects of aging, sunlight, ozone, oxidation and weather. Also flame resistant, it demonstrates heat stability up to 93C (200F). Our heavy-duty Chemstop™ neoprene gloves are resistant to a broad range of oils and chemicals that attack natural rubber gloves. They provide excellent protection from acids, caustics, oils, grease, and many solvents. Gloves are 30 cm. (12") in length, 30 mil thick for added protection, and flock lined to absorb perspiration.

NE3030 Chemstop™ 12" unsupported Neoprene, .030" thick, Sizes 7, 8, 9, 10

CHEMSTOP

Engineered hand protection for every industry™
