SUPPORTED glove w/cotton-jersey liner

FUNCTIONAL BENEFITS:

Rough finish on hand portion provides excellent wet/dry grip

Latex performs well in temperatures ranging from -18°C to 149°C (0°F -300°F)

Good puncture and abrasion resistance

Cotton-jersey glove support is cool, comfortable, and absorbs sweat

Highly dexterous

Easy On/Off

APPLICATIONS:

Fisheries

Handling frozen food or hot containers

Glass handling

Sheet metal assembly

Laboratories

Agriculture

Chemical plants

Plant maintenance

L8230

Orange Roughie™ latex supported glove w/cotton-jersey liner

Latex-dipped, wrinkle-finish palm on a cotton-jersey support. The Orange Roughie™ provides the comfort and flexibility of an unsupported glove, in a supported one that's tough and long-wearing. And, because latex withstands a wide range of temperatures, gloves can be used in both moderately hot and cold situations. (Latex stays flexible and durable between -18°C and 149°C (0°F -300°F).) These gloves are very popular in the commercial fishing industry because of their excellent grip, high dexterity and good abrasion resistance. And, the inner cotton-jersey liner significantly reduces heat transfer, while keeping hands dry and comfortable by absorbing perspiration.

L8230 12" long, wrinkle finish
Sizes 8, 9, 10

**ORANGE
ROUGHIE**

Engineered hand protection for every industry™
