

Item No.

NI4622/NIF3018/NI3822

N Series, **UNSUPPORTED NITRILE** **Gloves**

FUNCTIONAL BENEFITS:

Three times stronger than latex

They offer exceptional puncture resistance in addition to great abrasion and snag resistance

Perform in a wide range of temperatures, from -4° to 149° C (25° - 300° F)

They resist oils, fuels, and certain organic solvents, making them a great choice for red meat and poultry processing, chemical processing, machining operations using cutting oil, and battery manufacturing

These unsupported gloves have an embossed finish for a better grip

APPLICATIONS:

Red meat and poultry processing

Chemical processing

Machining operations using cutting oil

Battery manufacturing

N SERIES UNSUPPORTED NITRILE GLOVES

Nitrile gloves offer many benefits. Three times stronger than latex, they offer exceptional puncture resistance in addition to great abrasion and snag resistance, and perform in a wide range of temperatures, from -4° to 149° C (25° - 300° F) They resist oils, fuels, and certain organic solvents, making them a great choice for red meat and poultry processing, chemical processing, machining operations using cutting oil, and battery manufacturing. And they are a great alternative for those with latex allergies. These unsupported gloves have an embossed finish for a better grip. CFIA approved for food handling.
