

Item No.

TKNT/TKNT-7/TKNTC

Terry NT - Heavy-duty, **NITRILE-DIPPED** Gloves

FUNCTIONAL BENEFITS:

Terry loops on the inside provide insulation, cushioning, allow gloves to be dipped

Nitrile coating on palms resists oils, liquids, puncture, cut, abrasion and heat up to 300F(149C)

Available with regular palm coat or 3/4 dip, for better coverage

Terry is comfortable, absorbent, and open backs make gloves breathable.

APPLICATIONS:

Car/Automotive

Steel Mills

Construction

Material Handling:

- Castings
- Scrap Metal
- Logs, Lumber
- Concrete, Bricks

Terry NT - Heavy-duty Nitrile-dipped Gloves

Got a tough job? Bring it on, because here's a glove that can really take it. Our TERRY NT gloves feature a 20 oz. terry seamless-knit shell dipped in nitrile. Nitrile is a co-polymer of acrylonitrile and butadiene with excellent abrasion and puncture resistance. It stands up to oil far better than latex, making these gloves a great choice for metal stamping or handling oily parts. And, although not flame-resistant, nitrile withstands moderate heat. Gloves function well in the -4°C-149°C (25°F-300°F) temperature range. Breathable terry is known for its insulating properties, because the looped-pile construction traps air, providing a buffer between the hands and hot/cold objects being handled while providing seamless comfort. Our loops-in style allows gloves to be dipped, which they are while on an ergonomic hand form, resulting in a curved hand and finger shape that provides a natural fit and flexibility. TERRY NT is a rugged glove for work like draw-press, shearing and punch-press operations. Also good for handling castings, scrap metal, logs and lumber, as well as concrete blocks and bricks.

TKNT

Knit terry shell with nitrile palm coat. Men's or ladies (TKNT-7)

TKNTC

'Classic' knit terry shell 3/4 nitrile-dipped, one-size only.

Sizes 7 - 10

Engineered hand protection for every industry™
