FUNCTIONAL BENEFITS:

Superior abrasion, cut and puncture resistance.

100% cotton seamless knit shell.

Unsurpassed comfort and dexterity.

APPLICATIONS:

Automotive
Metal Stamping
Small Parts Handling
Maintenance
Construction

What is THT?

Introducing the most revolutionary change to knit gloves since we learned to count to 5: a glove that's shaped like a human hand.

True Hand Technology, **THT™** from Superior is the first knit glove that's actually designed to fit your hand perfectly. The greater comfort and wear of a knit glove is now available with improved fit and dexterity.

How? It's simple. . . really, every other string knit glove is shaped the same way. Unfortunately none of them are shaped like a human hand. **THT™** changes this by creating a glove where the crotch of the baby finger is lower, just like it is on your hand.
