Washable

APPLICATIONS:

Electronics
Assembly
Paintline

Lint-free Slip-on Style Nylon Inspector's Gloves

An inspector's glove is designed to protect the product from your hands, making them a fairly unique product in the work glove category. They protect sensitive surfaces from dirt, oils and scratches.

Our nylon tricot gloves are lint free, and come in two styles: reversible and fitted.

The N10R is reversible for greater cost savings, while the N10F features a parade forchette thumb for a more accurate fit. Both styles are lint free and slip on easily for use in electronics, paint lines and any application where protection from contamination is required.

N10R	Reversible pattern, lint-free nylon, slip-on style. Mens or Ladies
N10F	Forchette thumb, slip-on, lint-free nylon. Mens or Ladies

Engineered hand protection for every industry[®]
