

THIS IS HOW THEY SEE YOUR HAND. THIS IS HOW SUPERIOR SEES IT.

Introducing the most revolutionary change to knit gloves since we learned to count to 5: a glove that's shaped like a HUMAN HAND.

True Hand Technology, THT from Superior are the first knit gloves that are actually designed to fit your hand perfectly. The greater comfort and wear of a knit glove is now available with improved fit and dexterity.

How? It's simple really, all other string knit gloves are shaped the same way. Unfortunately none of them are shaped like a human hand. THT changes this by creating a glove where the crotch of the baby finger is lower, just like it is on your hand. THT is available on a wide variety of glove styles, from our Sure-Knit Cotton and Kevlar® gloves, our Dexterity Nitrile coated gloves and our Action and Sidewall Leather palm gloves.

Ask for a sample. Once you see and feel the difference you'll demand THT every time.

Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.
