FUNCTIONAL BENEFITS:

Triple layer of Tri-tan leather on the thumb crotch
Palm lined
Reinforced finger tips and straps
Completely Kevlar® sewn
Polyurethane reinforced cuff
One size fits all

APPLICATIONS:

Lumber Yards
Construction
Metal Fabrication
Forestry

Crewmate™, Triple Layer Fitter Gloves

When it comes to new innovation in work gloves, you can count on the glove designers and R&D team at Superior glove. Whether inventing completely new styles of gloves, or improving existing ones, our team has turned out a lot of winners.

A double palm fitter glove is standard issue in many industries. A great glove, and hundreds of thousands are sold, but our people asked could we still not improve it? The standard 66BRR style fitter, has two layers of heavy split leather protection on the index finger, palm and thumb. The main wear area for many job applications, like lumber handling, is in the thumb crotch.

So a triple layer of leather protection in thumb is the what our team focused on. Not easy to deliver, and even impossible in a fitter glove style said many people. But hard work and the application of some new technology paid off, with the development of our new 66BRRR Crewmate™. Completely Kevlar® sewn, polyurethane reinforced cuff, and triple leather where it counts most.

66BRRR Heavy duty fitters glove, triple layer thumb protection, polyurethane reinforced cuff

Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company
