## FUNCTIONAL BENEFITS:

Genuine Clarino® wraparound palm, increasing protection and comfort

Knitted shell with Dyneema® for high cut and abrasion resistance

Kevlar® sewn

Elasticized cuff

## APPLICATIONS:

Automotive

Metal Stamping

Parts Assembly

Material Handling

Item. **S13DYCP**

## Clarino® Leather Palm on a Knitted Shell with Dyneema®

Our 'Action' Leather Palms have become the industry standard for heavy duty cut resistance and durability. Now our R&D department have combined the high abrasion resistance of our Clarino® man-made leather palm with the excellent comfort and cut resistance of a seamless knitted glove with Dyneema®. The Clarino® palm wraps around the sides of the fingers increasing protection and comfort, extending glove life. Complete with full Clarino® thumb and all seams are Kevlar® sewn.

Dyneema® is 15 times stronger than steel on an equal weight basis and twice as strong as Kevlar. It is also a lint free, continuous filament yarn. With a Clarino man-made leather palm and a glove body with Dyneema®, these gloves give an unparalleled cut resistance for a glove of such high dexterity and flexibility. A good choice for handling sharp steel.

**S13DYCP** Clarino Palm, on a Dyneema® shell  
Sizes S - XL

Dyneema® is a registered trademark of Royal DSM N.V.

Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company
