FUNCTIONAL BENEFITS:

Made from a premium, super-soft PVC formulation applied to seamless-knit 13-gauge cotton shell

Ergonomic design gloves are shaped to your hands, meaning a lot less hand fatigue

Heavy-weight PVC construction provides oil resistance, while retaining dexterity and tactile feel

Good wet or dry grip

Lined or unlined for colder temperatures

APPLICATIONS:

Fisheries
Automotive
Maintenance
Petrol-chemical

SH260L

S230

SH230

Torpedo Plus, Super Flexible PVC Gloves

Torpedo Plus™ gloves take the comfort, flexibility and fit of fully coated gloves to a new level; they have to be tried to be believed. They are made from a premium, super-soft PVC formulation applied to seamless-knit 13-gauge cotton shells while over well-engineered, ergonomically-shaped hand forms. The result are gloves shaped to your hands, meaning a lot less hand fatigue. The S230FL winter version is fully lined with soft, insulating acrylic pile. The SH models are blue, indicating a heavier weight of PVC that is still very flexible. This heavier, supported glove provides added oil resistance, while retaining the dexterity and tactile sensitivity of the lighter version. SH230 is 12" long, while the SH260L is 23" with elastic binding at the hem to keep gloves comfortably in place.

S225	10", soft flexible PVC on a seamless knit shell, Sizes M, L, XL, XXL
S230	12", soft flexible PVC on a seamless knit shell, Sizes M, L, XL, XXL
S230FL	12", soft flexible PVC, Acrylic lined, Sizes M, L, XL
