Reinforced thumb crotch made with a super-strong Kevlar® for greater cut-resistance

Entire glove is treated with Teflon® fabric protector to prevent oil penetration

APPLICATIONS:

Parts Handling
Car/Automotive
Forestry

TRKOW

Blackgold Oil Resistant Gloves

The seams in traditional cut and sewn gloves are the first area to fail and can also create discomfort in pressure-point areas. Our Blackgold gloves are a seamless knit, providing comfort, longer wear, and better dexterity, with a snug-fitting wrist. (Powerful elastic yarn is knit into the cuff.) Gloves are sized larger prior to being washed, and shrunk by 7%, so that they retain their intended size. The thumb crotch is reinforced with super-strong Kevlar® for enhanced cut-resistance, while the whole glove is treated with Teflon® fabric protector to prevent oil penetration. The gloves stay cleaner longer, while the dark colour hides dirt and oil marks. A significantly better value than traditional cut and sewn gloves.
