Trapping, hunting
Law Enforcement
Search and rescue
Military
Wildlife management
Construction
Cold storage
Snowmobiling/recreational

**Worlds
Warmest
MITT**

SNOWD200L

SNOW Series - Deluxe Winter Mitt

Superior is so confident in our Snow series deluxe winter mitt, that we guarantee it will be the warmest mitt you've ever experienced, or your money back. We recently worked some improvements into them too. They were designed with cold Canadian arctic winters in mind. The deluxe calfskin outer layer features a sidewall construction to allow ample room for the removable liner. Elasticized wrists ensure a snug fit to keep the elements out, and all seams are fully welted for durability. We changed the material in the extra-wide, double-layer nylon gauntlet cuff to a much softer nylon and switched to a thicker pile in the removable cheek wiper to be kinder to your skin in sub-zero temperatures. Overall mitt length is 17" to fit over parkas sleeves, with straps for tightening and adjusting, and a new loop at the end of the gauntlet cuff for hanging gloves when drying or storing. The removable liner is the best we have ever designed, consisting of four separate layers of material that provide incomparable warmth. The two layers in the middle are cut from 400-grams-per-square-meter Thinsulate. These are then sandwiched between two foam-to-fleece laminate layers, and the whole liner is easily removed using velcro for easy drying. We truly believe it is the world's warmest glove.

SNOWD200L Deluxe winter mitt, Black leather calfskin, removable **'Temperloc'** lining, 6.5" nylon gauntlet cuff

Engineered hand protection for every industry®
