Tire Core Sleeve with Gusset

Superior introduces a new choice in protective sleeves, for those looking for better cut resistance without sacrificing comfort. Our new SLTC/C19G tire-core sleeves offer full arm protection, with a CPPT of 480 grams for added resistance to cuts, abrasion, snags and tears when working with materials like sheet metal. Plated on the inside with cotton, these sleeves stay cooler than most, and the tire core knit is gusseted with an elastic casing at the top for a better, tapered fit. And best of all, they are economically priced as well. So, for situations where you need protection from cuts, abrasion, and dirt, but don't want to give up comfort, our new SLTC are the perfect choice. Applications include glass plants, metal fabrication and automotive assembly. 19" long.
