NEW

Fusion™, Cut and Chemical Resistant **HYBRID GLOVES** with Dyneema® and PVC

FUNCTIONAL BENEFITS:

Revolutionary cut and chemical glove combining the incredible cut resistance of Dyneema® with flexible, chemical-resistant PVC

Cut level 2

PVC and Dyneema® together guard against the dual hazard of sharp materials and chemical exposure

The knit shell with Dyneema® is bonded on the outside to an ergonomically shaped PVC glove, while a cotton liner provides comfort and warmth

Knit exterior with Dyneema® provides texture for a good wet grip

APPLICATIONS:

- Metal stamping
- Glass handling
- Food preparation
- Material Handling
- Assembly

FUSION™, Cut and Chemical Resistant Hybrid Gloves with Dyneema®/PVC

FUSION™ is a revolutionary new glove from Superior that offers the kind of protection one could only dream of before. We've combined the incredible cut resistance of Dyneema® with flexible, chemical-resistant PVC for a glove that guards against the dual hazard of sharp materials and chemical exposure, effectively replacing the two glove system of the past. A knit shell with Dyneema® is bonded on the outside to an ergonomically shaped PVC glove, while a cotton liner provides comfort and warmth. This knit exterior provides texture for a good wet grip and the gloves have great dexterity.

Before, in order to obtain both cut and chemical resistance, a chemical-resistant glove would be placed over a cut-resistant knit; this system failed as soon as a tear in the outer glove occurred. The Fusion eliminates that problem, and is perfect for applications such as the food industry or metal fabrication. Gloves can be sterilized for reuse as both Dyneema® and PVC can be laundering and can be exposed to bleach.

SDY/225

Cut and chemical resistant glove, knit shell with Dyneema® on a PVC coated glove with cotton liner, Sizes: M, L, XL

Dyneema® is a registered trademark of Royal DSM N.V.

Superior **Quality**. Superior **Service**. Superior **Glove**
