

Item No.
BPS/BPE/BPEOB

Heavyweight **BAKERS PAD**

FUNCTIONAL BENEFITS:

Heat Resistant

For intermittent handling of hot objects up to 450°F.

APPLICATIONS:

Food Processing

Bakeries

Restaurants

TECHNOLOGY - BAKERSPADS/MITTS

We offer a range of protection against thermal burns for workers handling hot objects in food processing applications. Cotton terry pads and gloves are a wise choice for bakers, when the burn risk is dry. For those handling large vessels involving liquids and oils, neoprene offers protection against both dry and steam burns and scalding, as the material is liquid-repellant, and has a higher insulation value than cotton terry. Neoprene also features excellent grip for both wet and dry objects.

#BPE Bakers Pad

#BPS Bakers Pad

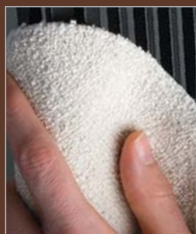

#BPEOB Bakers Pad

TECH 1

Baker's pads leave hands free for intermittent handling of hot objects when multi-tasking. Available with Oilbloc to prevent oil soak-through.

TECH 2

Thick terry provides maximum insulation from objects up to 450° F, while natural color hides stains better.

Bakers Pad

- Heavyweight double thick terry cloth
- Preshrunk – fully washable
- Available with either elastic strap or hand slot for instant on and off

Also available, Bakers Pad with Oilbloc. Fully lined with vinyl to prevent oil and grease from penetrating

BPS	Hand slot
BPE	Elastic strap
BPEOB	Elastic strap with OILBLOC
