PVC coating with micropores for optimal flexibility in cold/sub-zero temperatures

Palm coat provides an excellent grip, wet or dry

Fleece lining is soft, warm

Quick-drying and lightweight, for all-day comfort

Good dexterity for a glove this warm and water-resistant

APPLICATIONS:

Commercial fisheries

Agriculture

Construction

Utilities

Cold storage facilities

SNTAPVC

Dexterity™ Winter-lined Nylon Gloves with PVC Palm

Warm, dry and flexible: these are the top characteristics built into our new Dexterity™ PVC-Coated gloves.

Warm. Because of the two layers of fabric: nylon on the outside and soft fleece on the inside, for a glove that's light, warm, and provides enhanced protection against abrasion and impact.

Dry. Because of the crinkle-grip PVC palm-coating, which is your assurance that hands stay dry and especially warm.

Flexible. Because of the specially formulated PVC palm-coating, filled with tiny air bubbles to stay flexible even in colder temperatures - a coating that's thinner, so you don't have to give up flexibility and comfort, and with a grip that's outstanding, wet or dry. An ideal glove for workers in commercial fishing, agriculture, construction, utilities, cold storage and any other occupation where winter conditions are a factor.

SNTAPVC Winter-lined, red nylon gloves with black PVC palm, Sizes M - XL

Engineered hand protection for every industry®
