**6CH5S**

## Lineman, Class 0 and 00

# LOW VOLTAGE RUBBER Glove Protectors

### FUNCTIONAL BENEFITS:

Tailored cover glove fits over low-voltage rubber gloves

Goatskin retains strength even when thin for unbeatable puncture- and tear-resistance

Gloves provide form-fitting comfort

Designed with input from field workers

Gunn-cut styling removes seams from wear areas for greater durability

Pull strap for custom fit; non-metallic buckle to adjust

### APPLICATIONS:

Linemen  
Utilities

### WARNING!

Leather protectors provide only mechanical protection for rubber insulating gloves, and when used alone, do not provide any protection against serious injury, death or other potential dangers from electrical shocks and burns. Leather protector gloves must always be used and are to be worn over the rubber insulating gloves. The protector should be inspected the same time the rubber gloves are inspected. Look for metal particles, embedded wire, abrasive materials or any substance that could cause puncture, abrasion, contamination or deterioration. Adequate flashover distance between the top of the protector and bead of the rubber gloves should be maintained.

### Lineman, Class 0 and 00, Low Voltage Rubber Glove Protectors

High- and low-voltage rubber gloves have poor puncture resistance. For this reason, it is recommended that a leather outer glove be worn for mechanical protection. Superior Glove's new goatskin low-voltage rubber glove protectors are stronger and harder-wearing than our previous protectors, and yet provide amazing feel and dexterity. Goatskin is renowned for its strength, offering incomparable tear- and puncture-resistance, even when very thin.

They were designed with the help of experienced field workers - people who use these products every day. The result is a well-tailored glove that minimizes the loss of feel and mobility that can occur when wearing an outer glove. Gloves are sewn in a gunn-cut pattern construction to remove seams from high-wear areas between the fingers for increased durability. They also come equipped with a non-metallic buckle on the pull strap for a custom fit.
