

Item No.
CS13DES

NEW

Cleanroom Anti-static 13-GAUGE GREY CUT-RESISTANT Gloves made with Dyneema®

FUNCTIONAL BENEFITS:

Gloves contain carbon filament throughout for electro-static dissipating properties

Class 100 Cleanroom washed and processed to minimize contamination from dust and particles

Fine gauge for great dexterity and touch sensitivity

Protects goods and improves productivity during precision work, computer assembly, semiconductor assembly, compact disk industry, photo film handling, electric & electronic parts assembly etc

Chemically inert, easily disinfected with bleach or other strong alkaline solution; however, Dyneema® will melt at 270°F (130°C)

Cut resistance is ASTM cut-level 1/CE cut-level 2

APPLICATIONS:

Electronics
Circuit boards
Pharmaceutical
High tech./cleanroom assembly
Automotive paint line

Cleanroom Anti-static 13-gauge Grey Cut-resistant Gloves made with Dyneema®

Seamless-knit glove made with lint-free, continuous-filament Dyneema® blended with ESD carbon filament to impart anti-static properties. Fine-gauge (400-denier) gloves cleanroom treated to eliminate dust and particulate contamination, and made with THT™ for a superior fit. This glove is ideal for those in the electronics industry, or in any application where cut protection is required. Gloves provide great touch sensitivity for precision work on items like circuit boards, etc. that involve cut hazards.

The physical properties of Dyneema® fiber produce durable, cut-resistant gloves that provide excellent dexterity and sensitivity without sacrificing comfort. The base polymer of Dyneema® is Ultra High Molecular Weight (UHMW) polyethylene. Pound for pound, Dyneema® is fifteen-times stronger than steel, while the slickness of the fiber allows sharp edges or objects to slide across the surface of the glove, minimizing damage to the fiber and protecting against abrasive and slicing cuts. Not for use around heat, as Dyneema® will melt at 270°F (130°C).

CS13DES 13-gauge, fine-dexterity gloves with Dyneema®, cleanroom-processed, anti-static
Sizes XS-XXXL

Dyneema® is a registered trademark of Royal DSM N.V.
Superior is a licensed Manufacturer of DSM Dyneema®

Engineered hand protection for every industry™
