FUNCTIONAL BENEFITS:

Winter-weight brown jersey consists of three bonded layers: cotton outer, foam and nylon inside

Foam lining traps warmth, keeps hands toasty on the coldest days

Excellent abrasion resistance; foam cushions hands against knocks

Snug knit wrist keep cold air and debris out and gloves in place

Machine washable

Brown colour hides dirt and stains

APPLICATIONS:

Construction

Cold weather

Agriculture

General-purpose

Material Handling

Maintenance

Transportation

Cold Storage

Foam lining traps warmth

BJ22

Triple-layer Brown-Jersey Winter Gloves

Brown, clute-cut, cotton-jersey gloves are cut and sewn from special triple-layer 22 ounce fabric. A thick layer of foam is sandwiched between brown cotton jersey on the outside and nylon tricot on the inside, for a warm, cushiony layer of protection from abrasion and cold. Foam is a great insulator because the air pockets trap warmth. Heavy-duty outer fabric withstands wear and tear for longer glove life. Snug knit wrist keeps gloves firmly in place and cold air and debris out. Gloves are washable.

BJ22 Winter-weight, triple-layer brown jersey glove, clute cut with knit-wrist cuff

Engineered hand protection for every industry®
