## SilaChlor® Heat-Resistant String-Knit Combination Glove with Leather Palm

Superior's new SilaChlor® combination gloves provide amazing protection against thermal burn by incorporating what just might be the best in thermal hand protection to come along in years. SilaChlor® is a revolutionary new material that provides unbelievable, economical heat protection. A heavyweight seamless cotton/poly knit shell and an outer leather palm envelop the SilaChlor® layer, for an insulation value that is unrivalled. More than that, however, is the fact that even with three layers, these gloves retain their dexterity. We made them wider for comfort, but the real miracle is that with protection between 250°F and 425°F, you don't have to give up flexibility. With the presence of SilaChlor®, a glove can be a glove: no more bulky, awkward mitts. The second feature is our leather palms - a standard in the industry - that wrap around the index finger and thumb, along with an added piece of leather on the thumb crotch to increase protection and wear substantially. Gloves last longer, and are easier to launder. Comfortable, durable protection against heat and abrasion, with excellent value.

SCPSCLP SilaChlor® combination leather palm and string-knit glove, Size L

Engineered hand protection for every industry™
