

Item No.  
**S13SXCNT**

# Superior Touch, FULLY NITRILE-COATED Gloves made with Dyneema®

## FUNCTIONAL BENEFITS:

Great protection when working with sharp materials and machinery

Full palm nitrile coating protects against oils and solvents

Cut protection is ASTM cut-level 1, CE cut-level 3

Excellent abrasion, puncture and tear resistance

Completely silicone-free, making them a great choice for automotive assembly

Dimethylformamide (DMF) and lint free

High dexterity and flexibility, glove features snug knit wrists for all-day comfort

## APPLICATIONS:

Sharp Steel	Petrochemical
Glass	Aerospace Industry
Circuit Boards	Metal Fabrication
Automotive	Maintenance

S13SXCNT

## Superior Touch Fully Nitrile-coated Glove made with Dyneema®

Superior Touch™ gloves made with Dyneema® feature a full nitrile coating, for complete protection from oils and solvents. Nitrile rubber is a co-polymer of acrylonitrile and butadiene, offering excellent resistance to punctures, cuts, snags, and abrasion, and although not flame-resistant, demonstrates functional performance in temperatures ranging from -4-149°C (25-300°F). Nitrile has considerable resistance to oils, fuels, and certain organic solvents. Our string-knit glove is made with Dyneema®, which is fifteen-times stronger than steel on an equal-weight basis, and is a lint-free, continuous-filament yarn. Gloves scored an ASTM cut-level 1/ CE 3 rating, with excellent abrasion resistance as well. And, because the entire glove is silicone free, they are an excellent choice for automotive workers. They are also suitable for workers handling sharp steel, glass or circuit boards, especially when lint and particulate contamination is a concern. Best of all, they are highly dexterous and comfortable. Snug knit wrist keeps gloves snugly in place, and blue nitrile coating makes gloves fully oil resistant.

**S13SXCNT** Superior Touch Fully nitrile-coated cut-resistant grey glove made with Dyneema®  
Sizes 7, 8, 9, 10

**Superior  
TOUCH**

**Gloves that don't feel  
like gloves.**

Industrial gloves made with Dyneema®, the world's strongest fiber, offer exceptional protection against cuts and abrasion, as well as light weight and comfort. In addition to enabling "gloves that don't feel like gloves," Dyneema® polyethylene fibers provide great flexibility and cost efficiency for end-users.
