SureKnit™ CUT-RESISTANT GLOVE

made with Dyneema®/Nylon/Cotton Blend

FUNCTIONAL BENEFITS:

- Excellent cut and abrasion resistance
- Snug comfortable fit
- High dexterity and flexibility
- Salt-and-pepper color hides dirt for longer wear
- Washable, can be bleached, no heat
- Sizes: XS-XL

APPLICATIONS:

- Automotive
- Sharp Steel
- Glass
- Circuit Boards

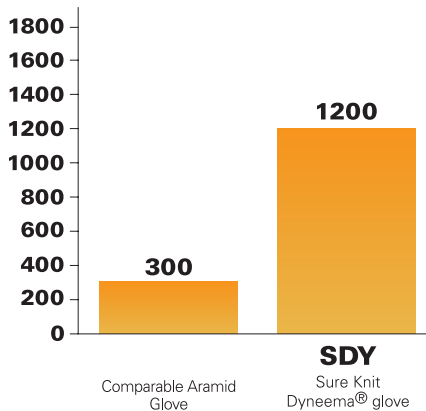

Cut-resistant Glove made with Dyneema®/Nylon/Cotton Blend

Spun yarn is a blend of Dyneema®, nylon and cotton for great cut and abrasion protection, plus better grip. Our unique spinning process combines three different fibers for a yarn that gets around the problem of the slippery feel inherent in Dyneema® yarn. Cut resistance is an impressive level-two, while abrasion resistance is an outstanding level-four, since this glove survived 6500 cycles on the Taber machine before wear through. In fact, abrasion resistance is ten times that of a comparable (cut-level 2) aramid string-knit glove.

Glove is also less expensive than previous versions. Salt-and-pepper color hides dirt and grime for longer wear and greater cost savings.

**Abrasion Resistance
