**STN120/STN120HF/STN220**

# Superior Touch SEAMLESS KNIT NYLON Gloves

## FUNCTIONAL BENEFITS:

Reusable / Washable

Ambidextrous

High Dexterity

## APPLICATIONS:

Inspection

Glove Liner

Paint Line

Electronics

Cleanroom

Aerospace

## What is THT?

Introducing the most revolutionary change to knit gloves since we learned to count to 5: a glove that's shaped like a human hand.

True Hand Technology, **THT™** from Superior is the first knit glove that's actually designed to fit your hand perfectly. The greater comfort and wear of a knit glove is now available with improved fit and dexterity.

**How?** It's simple. . . really, every other string knit glove is shaped the same way. Unfortunately none of them are shaped like a human hand. **THT™** changes this by creating a glove where the crotch of the baby finger is lower, just like it is on your hand.

## Superior Touch Seamless Knit Nylon Gloves

Seamless knit of lint-free, continuous filament nylon. Will not impair dexterity or touch sensitivity in any way. Special process seals the finger openings resulting in no loose fibres. Can be used as an inspector glove or can be worn as a glove liner under Vinyl, Latex or Nitrile disposable gloves.
