Seamless construction and shaped to the hand for greater comfort

Gloves are dipped over an ergonomic hand form for greater comfort and less hand fatigue

Available in a high visibility yellow colour for increased workplace safety

APPLICATIONS:

Material Handling
Automotive Industry
Construction
Masonry Work
Forestry

Terry LX - Terry Knit Shell with Latex Palm

Terry gloves are known for their insulating properties. The looped-pile construction traps air, providing a buffer between the hands and the hot or cold objects being handled, providing seamless comfort in many situations. And now, they are made in a high-visibility neon yellow for increased worker safety. Dipped in latex and given a unique crinkle finish, they do double-duty by providing an excellent wet or dry grip. Gloves are dipped while on an ergonomic hand form and are highly flexible, for less hand fatigue. Great as a general-purpose glove, they are tough, durable and comfortable over long periods.
