FUNCTIONAL BENEFITS:

Double dip, premium PVC/Nitrile blend for excellent chemical resistance

Comfortable jersey lining

Rough sand-finish palm for enhanced wet grip

Engineered for handling acids, oils, grease, caustics

14" length (36cm)

APPLICATIONS:

Petrochemical industry
Chemical Processing
General Chemical Practices

R236

Cheminator 14" Premium-grade PVC/Nitrile Supported Gloves

Put your trust in the Cheminator: a premium-grade blend of PVC and nitrile that has you covered against a wide range of exposure. Gloves start with a comfortable jersey support, which is then double dipped for that best-of-both-worlds chemical protection. PVC is great for aqueous solutions, detergents, and acids, while nitrile is highly resistant to oils, fuels and solvents. Plus, nitrile offers better puncture and tear resistance for tougher wear and longer glove life. Ideal for petrochemical workers, gloves are 14" long for great forearm protection. Palms have a rough sand-patch finish for increased grip.
