GU-500

GU-500

These gloves provide excellent cut and puncture protection for meat and poultry workers and for other applications where maximum protection is required. They feature a taper-fit design and a patented system which makes changing a left hand glove into a right hand glove fast and simple. Colour coded wrist straps for easy size identification. USDA approved, UL listed.

645SS

645SS

Steel-stitched gloves are used in the heaviest, most demanding applications. Hundreds of heavy-gauge stainless steel staples cover the gloves working surface, making this glove ideal for handling sharp steel or glass. This is the style that the Armed Forces use for handling barbed wire or razor wire.

Any of the **Sure-Knit** styles can be worn as a liner under our GU-500.
