welt protected
Fully flannel lined

335TBDTIG

Tig welding style
Temperbloc palm, Kevlar® coated with Silicone
Premium deerskin back of hand
Fully Kevlar® sewn

APPLICATIONS:

Welding
Grinding
Metal Fabrication

Contains Silicone!

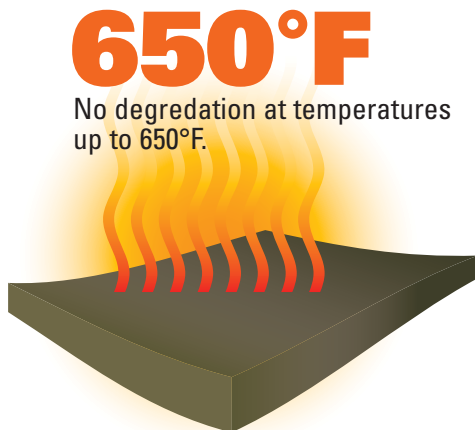

Premium Deerskin TIG and Sidesplit Welding Gloves with Temperbloc Palms

Welding gloves have always been made out of leather. Nothing better. Well up to now that is. Superior is excited to introduce the next generation of welding gloves to the market. The palms are made of a revolutionary new high heat resistant material called **Temperbloc**, which is a Silicone coated Kevlar®. **Temperbloc**, has heat resistance properties far higher than leather. Plus excellent wet and dry grip, great dexterity and flexibility, as well as long wearing durability.

Designed from the ground up with input from welding school instructors. These gloves don't stiffen and harden like regular all leather welding gloves. Try a pair and we bet you won't go back to old fashioned welding gloves ever again.
