Emerald CX Gloves

Superior's SNW/CP wire-core glove series feature a range of cost-effective, cut-resistant gloves. Emerald CX is our own composite yarn that blends cost savings with great performance. Their cut-resistance is achieved by combining polyester, cotton and stainless-steel wire core. The wire core is completely encased by cotton fiber for improved comfort and no risk of metal popping through to the hand or to objects being handled. This also increases glove life and makes them an economical choice. Gloves are rated ASTM cut-level 3, are long-wearing and fully launderable. Speckled blue color hides dirt better for longer wear. Available in three styles: regular knit; PVC dotted for good grip; and nitrile palm coat for puncture resistance. Gloves are an ideal choice for moderate cut applications such as handling metal stampings or other sharp materials.
