

Item No.  
**SCXSMNT**

**NEW**

# Emerald CX Series, **KEVLAR®/WIRE-CORE** Gloves w/Steel-Mesh Palms

## FUNCTIONAL BENEFITS:

Flexible, highly cut-resistant mesh layer in palm area protects vulnerable areas from slashing cuts

Palms are coated in highly puncture-resistant nitrile, keeping mesh firmly in place and increasing grip

Gloves are rated CE Cut-level 5/ASTM Level 5

Glove body knit from 10-gauge Kevlar®, wire-core steel and nylon blend for stellar cut protection

Over a quarter-mile of steel in each glove for exceptional cut and abrasion resistance

Gloves are ergonomically shaped for comfort, dexterity and better worker compliance

## APPLICATIONS:

Metal Stamping and Fabrication  
Assembly  
Glass Handling  
Sheet Metal Work  
Sharp Steel  
Automotive

SCXSMNT

## Emerald CX Series, Kevlar®/Wire-core Gloves w/Steel-Mesh Palms

Emerald CX is Superior Glove's engineered blend of super-strong materials, combining some of the strongest fibers known to man: stainless steel, Kevlar® and stainless steel mesh. Besides their cut-resistance, the best thing about these gloves is that they don't feel like highly cut-resistant gloves, which is amazing when you consider that you're wearing a quarter mile of steel on your hands. This model features a fine, highly flexible, cut-resistant mesh layer between the glove body and the nitrile palm coating. This layer is barely noticeable, yet it withstood over 3500 grams of force in lab trials. Compare that to a heavyweight leather glove, which cuts at under 150 grams. In addition to stellar cut resistance, high abrasion resistance and exceptional comfort, Emerald CX is where value meets performance; you would expect to pay a lot more for a glove with such impressive stats. Test them in your own demanding applications!
