

Item No.
SDYF/SDYFD

NEW

SureKnit, Cut-resistant SPUN COMPOSITE BLEND with Dyneema®, Fiberglass, Nylon & Cotton

FUNCTIONAL BENEFITS:

ASTM 1790-05 cut-level four; gloves offer 2450 grams of cut resistance

High abrasion-resistance enhances cut resistance over the lifespan of the glove

Addition of fiberglass for dramatically higher cut protection

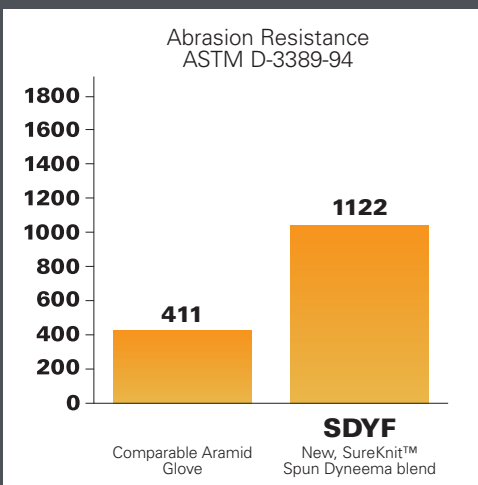

Gloves are snug fitting and comfortable: great dexterity and flexibility, washable

Grey speckled color hides dirt; hand-to-hand reversible for greater economy

Gloves can withstand intermittent thermal contact up to 325°F (we recommend laundering in tepid water however, due to the presence of the cotton fiber.)

APPLICATIONS:

Automotive
Sharp steel
Light metal stamping
Glass handling
Sharp-Edged Objects

SureKnit, Cut-resistant Spun Composite Blend with Dyneema®, Fiberglass, Nylon and Cotton

Spun yarn is a blend of Dyneema®, fiberglass, nylon and cotton for the ultimate in cut/abrasion protection, durability, and even increased grip. Our unique spinning process combines four fibers for a yarn that solves the problem of that slippery feel inherent in Dyneema® yarn.

Cut resistance is an outstanding ASTM level four, and abrasion resistance is high as well: gloves endured 1200 cycles on the Taber machine before wear through. When abrasion resistance is this high, cut resistance is boosted considerably over the lifespan of the glove, since less wear-through from abrasion preserves the overall fiber for longer-term cut protection.

Gloves will withstand intermittent thermal contact at temperatures up to 325°F with no degradation to the glove.

Salt-and-pepper color hides dirt and grime for longer wear and greater cost savings.
