Supported Neoprene Gloves

#NE246FFL

Heavy duty Neoprene glove resists a broad range of oils and chemicals that attack natural rubber gloves. Excellent protection from acids, caustics, oils, greases, and many solvents. The Cotton shell absorbs perspiration and cushions hands. This liquid, vapour and heat resistant thermal lined neoprene glove is suitable for many jobs as it protects against intermittent contact with hot objects up to 550°F. Working with steamers, deep fryers and rotisseries will be a lot safer. The extra long 18" length gives you added protection. It also withstands detergents and cleaning solutions and yet is easily sanitized using a three sink washmethod. CFIA Approved for Food Handling.
