Endura®

Premium TIG Welding Gloves

#398GLBG

These high-quality leather Endura® welding gloves are ideal for TIG welding and plasma cutting. Along with their attractive appearance they provide super tactile feel, flame resistance and comfort.

Though they're incredibly soft, since they're crafted with two of our highest performing leathers – suede leather and goat grain – these gloves offer impressive durability. Goatskin leather has high tensile strength and abrasion-resistant properties, and is often referred to as nature's strongest leather.

Made with soft, supple split leather backs and cuffs, these gloves are a dream to wear. The fleece heat barrier at the back, is perfect for welding applications: the back-of-hand area is rated ASTM level 2 for heat resistance.

The back of the hands are also elasticized for a snug fit. The charcoal color also hides dirt, allowing the glove to maintain its sharp aesthetic over time.

These gloves are also sewn with Kevlar® thread throughout for extra seam strength and additional flame resistance.

This style is also available in a short-cuff, multi-task version (#398GLBB).

Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Back of hand

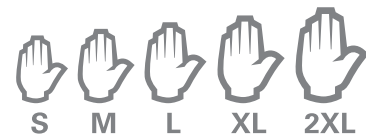

FEATURES

- Goatskin is incredibly durable and tough, while offering the highest tactile feel
- Suede leather backs and cuffs provide excellent abrasion resistance and comfort
- Back-of-hand fleece lining provides ASTM level 2 heat resistance
- Padded palms for vibration dampening
- Fully Kevlar® sewn throughout for added heat resistance and seam integrity

APPLICATIONS

TIG Welding
Grinding
Industrial Material Handling
Fabrication
