

#K835KPALP

Dragon™

High-Heat Leather Palm Glove with Kevlar® Outer Shell and Aluminized Reflective Felt Liner

#K835KPALP

Let the Dragon™ fight extreme heat for you! Designed to withstand high levels of heat, these gloves will give you the confidence to get the job done. We've combined several high-performance materials (such as wool terry, Kevlar®, split-leather, and an aluminized liner) to make this glove suitable for a variety of applications involving the handling of hot steel, glass, or other materials.

Kevlar® is the material of choice for this type of application, since it won't melt upon contact with open flames or hot materials. The aluminized liner also provides additional protection against burns in high-heat applications. This glove has an ANSI level 5 heat rating on the back of hand and ANSI level 3 heat rating on the palm. Plus excellent back of hand radiant heat protection.

The glove's seamless-knit construction and split-leather palms also provide unparalleled dexterity and comfort for workers.

These gloves also provide impressive ANSI cut level A4 protection – making them a great choice for handling sharp or rough metal objects.

Also available without the aluminized reflective felt liner (#K835KPLP).

CUT 2016

HEAT Back

HEAT Palm

2200 grams of cut protection.

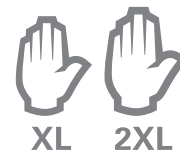

FEATURES

- 100% wool terry liner for contact heat protection
- Heat protection of up to 608°F (320°C)
- Aluminized heat reflective liner provides radiant heat protection
- Kevlar® outer shell for impressive ANSI A4 cut protection
- Side-split leather palms for excellent puncture and abrasion resistance
- Ideal for handling sharp or rough metal objects
- Elasticized wrist for snug fit

APPLICATIONS

Foundries
 Medium to High-Heat Applications
 Forging
 Steel Mills
 Aluminum Extrusion
 Glass Plants
