Endura®

Hi-Viz Chainsaw Gloves

#385CS

Superior's Endura® hi-viz chainsaw gloves are as comfortable, dexterous and good looking as a pair of our mechanics gloves, **but feature an eight-layer lining of Kevlar® on the back of the left hand**—a specific chain-arrest woven Kevlar®—that provides a level of cut resistance designed to withstand a chainsaw running at 3140 feet per minute. This meets the EN 381:1999 Class 0 for chainsaw cuts.

Other features include water-repellent, smooth, grain goatskin leather palms with built in anti-vibration reinforcement. This improves wear while reducing vibration transfer to the hand substantially. Hi-viz yellow backs are designed for optimal visibility. Elasticized Velcro wrists improve comfort, while keeping out debris. Backs are made with stretchy nylon/Lycra fabric, laminated with a water-repellent breathable membrane to keep hands dry.
