

#S13TAPUBH

TenActiv™

Cut-Resistant Palm Coated Gloves

#S13TAPUBH

Finally, a low-linting glove with cut resistance. We took the technology behind our best-selling TenActiv™ gloves to create a glove with excellent dexterity, good grip and most importantly cut resistance.

Gloves made with TenActiv™ have a characteristic smoothness to them. This increases cut resistance because a blade tends to slide over the surface of the glove instead of catching on the fibers. These gloves have an impressive 525 grams of cut protection for ANSI cut level A2.

These 13-gauge lint-free gloves are ideal for working with everything from circuit boards to pharmaceutical packaging.

Light and comfortable, it's easy to forget you're wearing them, which makes them a workplace safety and compliance dream.

TenActiv™ gloves are washable and bleachable (under 145°C) and offer a snug yet breathable fit.
