- Blended Kevlar®/composite-filament fiber lining for excellent cut resistance
- Full Thinsulate™ lining provides warmth without added weight and bulk
- Winter protection to -10° C / 14° F

ABOUT 399OBGKT5

To keep your hands clean and dry in the oiliest and wettest conditions, nothing beats our family of Oilbloc™ gloves. Made from goatskin, one of the most durable leathers, these gloves provide exceptional abrasion resistance while maintaining a soft, supple texture for ultimate comfort. Due to differences in color, there is an opportunity to improve the visual cohesion of our Oilbloc™ family of gloves, which will enhance our customer's shopping experience, and at the same time extend the life of the gloves.

WHAT HAS CHANGED?

The 399OBGKT5 has been updated from white to brown, creating a uniform appearance in our Oilbloc™ family of gloves. This will make it easier for customers to identify gloves with Oilbloc™ when making purchasing decisions or using gloves on the job site. In addition, the brown color will hide dirt much better than white, keeping the glove from appearing too soiled before its useful life is up.

This change is part of a rolling change. You may receive white gloves or a mix of white and brown gloves until all the white stock is depleted.
