Cool Grip®

Cut- and Heat-Resistant Plastic-Injection Mold-Trimming Gloves

#SPGRK/A

Cool Grip® heat-resistant glove specifically engineered for the plastic-injection molding industry. Featuring a blend of yarns that deliver extended thermal-heat resistance, plus cut and abrasion protection.

The plastic injection molding industry requires operators to trim the flash from hot plastic parts, so the glove-within-a-glove design works to trap air for increased insulating properties that last longer than regular heat-resistant styles.

They also feature impressive cut-resistant properties; the poly/composite filament fiber/aramid blend with an inner acrylic liner doesn't irritate skin.

They provide excellent dexterity and comfort for a heat-resistant glove offering this much performance.

To limit the risk of allergic reactions, all of our Canadian-made gloves are now crafted with latex-free materials.

Also available with PVC dotted both sides (#SPGRK/A2D).

CUT

ANSI
4
HEAT

3225 grams of cut protection.

FEATURES

- High heat protection up to 260°C or 500°F
- Designed specifically for the plastic-injection molding industry
- Glove-within-a-glove design traps air, insulates better, longer
- Good dexterity and comfort for a dual-purpose heat-resistant glove

APPLICATIONS

Plastic-Injection Molding
Car/Automotive
Steel Mills
Handling Hot Glass
Working with Metal Castings

AVAILABLE SIZES
