Heavy-Duty Back-of-Hand  
Impact Protection String Knit

#S10VSBLX

Cotton/nylon 10-gauge string knit is padded with a layer of vibration-dampening Chloroprene polymer at the back of the hand, and a heavy layer of rubber on the front. Good for protection from repetitive impact, these formed chloroprene backs are densely constructed and yet highly flexible, providing the wearer with the utmost comfort. Heavy-duty rubber palm coat protects against puncture wounds, and provides an excellent no-slip grip. Snug knit-wrist cuffs keep gloves firmly in place. Fully washable. Ideal for the petro-chemical industry and in mining, where protection is needed from frequent knocks to the back of the hand and a heavy-duty grip is required.
